SET SCORES IN QST

Recently a complete listing of the nations Simulated Emergency Test (SET) scores were printed in QST. E. Fla. ranked again second in the Nation. W. Fla. was 19th up from 42nd place last year. E. Fla. county highs were: 1st, Broward, WB4CKY EC, 726 points; 2nd, Polk, WA4WZZ EC, 471 points; Dade, WB4CBP EC, 454 points; Orange, W4BKC EC, 323 points and Hillsboro, W4BNE EC, 309 points. W. Fla.: Escambia, WB4JCV EC, 133 and Franklin, K4BDY EC 27.

In Sections net reports, QFN ranked 5th with 2603 points and WFPN 17th with 1432 points. All scores are UP from last year. Congratulations to all hands.

In January (probably last week-end) 1972 we will conduct another SET. Let's try just a little harder to become number one in the nation. It may hurt a little but the effort will be worth it. . . . AC

FIELD DAY SCORES

Where did all the flowers go? And where did all the Field Day scores go? We know for a fact the following participated in FD: W4NN, WB4VCZ, W4RYZ, WB4GTY, W4UC, WA4ECY and W4JJ all of W. Fla. but no scores submitted.

In E. Fla. W4EHW, K4KQ, W4TJM, W4HAW, W4NGR and many others — BUT no scores. Thus far received: W4LX-4 Ft. Myers ARC, 1 rig, ssb, 542 contacts for 1,284 points. Non-Club K4KE-4, St. Pete, 1 rig, SSB-CW 1065 contacts with a 2130 point claimed score. — Come on you guys — GIVE E. Editor.

CB'ers Plan To Fight Back

(The following from the Gold Coast Radio CB Club was submitted by W4BRB of West Palm Beach. It is unedited. ED)

The word is out. C-Bers' will not be allowed to obtain their call letters on their State Automobile tags. Due to some amateur radio operators' who seem to think that we are not entitled to have them. This to me is ridiculous. We are more able to handle local communications than they are and in case of disaster such as a hurricane, plane crash, or someone lost in the woods, there are many more of us than them. Now I have quite a few friends that are ham operators, I just don't understand why they are so against C-Bers'. I realize their distant communications are of the utmost importance in case of a great disaster and I appreciate their usefulness.

So it is most important that all C-Bers' write to your legislators and senators asking for this privilege after all there is a lot of revenue to be derived from the sale of these tags at \$1.00

more than the normal cost of the license tags. Therefore lets don't be tramped on. Get those cards and letters off to

Tallahassee now. Hams' can be cured.

L. W. McGehe
KBK-7649 Pres.

EX-CALLS

WAYNE COOPER, K4ZZV, of Miami Shores works on his delta-loop which appeared in Jan. 69 QST. Wayne checks the Gamma match with a modified bridge he described in QST several years ago. He used a half inch Andrews Coaxial line for the Gamma rod and condenser. It's an all-weather unit and can take the voltage. Extended, it is up 65 feet. For details drop K4ZZV a line at 9302 NW 2nd Pl., Miami Shores, FL 33150.

Letters To Editor

Editor:

Please make some kind of arrangement for continuation of subscription for those of us who travel a great deal. We don't want to miss any issues of SKIP. In the past I had used 3 year subscriptions.

I left home June 30 and just happened to come by to check the mail today before leaving for Florida and then on to Netherlands, Belgium, France, Germany, England, Rumania, Italy, India, Japan, etc. Finally to return Sept. 15th. If I hadn't come in today I would have lost my contact with Florida. Two years from September I hope to return for good when I retire. In the meantime SKIP let me what goes on in the Florida "ham world" while I am trotting around the world. It has become an annual affair. I do meet hams the world over and that makes some stops enjoyable. See you in 1973.

73

Charlie Chapman W4SVB
Bloomfield, N.J.

Editors Note: What do you suggest? What does QST CQ and others do in such cases? Von Voage.)

This will confirm our offer to give Extra, Advanced, and General Class examinations on October 16, 1971, at our office. We will take the Extra class at 8:30 AM, and the General and Advanced at 9 AM. Please advise us of the approximate number of applicants wishing to take the examinations.

We will appreciate copies of any articles appearing in FLORIDA SKIP for our records.

Sincerely,

John L. Theimer

500 Zack St.
Tampa, FL

Editor:

To my loving little xyl, so deliberately disgusted about my never ceasing en-

thusiasm of ham activities, I humbly want to nominate your award. I hope it will remind me of all the nightmares, literally that is, she's gone through without nagging too loudly.

And let's hope your award makes her happy and that she thinks over the sad fact of the existence of about half a million women having the same fatal marriage of a rat ham.

Yours sincerely,

OH3IP, Kari Salonen
Puhallajankatu 3
Fiihimaki, Finland

Editor:

Our Membership has now grown to 35, all of whom wish to nominate ROSE KOPP, XYL of Ken Kopp, WA4HAA, for a Dear Mabel Award. Our Repeater is now back on the Air (WB4HAE), after 5 weeks of extensive modifications and up-dating of equipment.

The work was all carried out in Ken's garage 5 nights a week and weekends, too. Rose provided all the workers with tea, coffee, pumpkin bread, cookies, some full meals, first-aid (band-aids), consolation to XYL's of other husbands involved and never complained.

For 5 weeks, her home was "Invaded" and Rose, in her own way, helped everyone concerned to accomplish their tasks. The night, or rather morning (3:00 A.M.) that the Repeater was readied for testing as a complete system, she stayed up and cooked ham and eggs, biscuits and gravy, and a wonderous pot of coffee to celebrate the occasion.

We, of the Tampa Bay Repeater Association want to express our thanks in part to her, by this nomination. 73.

Jack Howell, K4LMJ
TBRA, Tampa, FL.

Dear Editor:

GUEST EDITORIAL DO YOU DESERVE THE PRIVILEGE?

by Gene Burton, WA4YNNW

To use the amateur bands is a privilege. In exchange for this privilege, what is expected of you? What have you done to deserve this privilege?

Hams should be reasonably well read and informed. They should use good operating procedures and be a good example. A good ham knows the rules and operates in their framework. Do you read QST, CQ, Florida Skip, etc.?

Hams are courteous and tolerant. They recognize CW, AM, FM, SSB, & RTTY. Any one ham may not use all of these modes, but he recognizes the value and place each one plays in Amateur Radio.

Hams recognize and respect the interests of his fellow hams. DX, county hunting, and all kinds of certificate hunting are a real part of our hobby, as is rag chewing. Do you low rate and condemn any of these areas?

Hams help other hams. How long has it been since you have encouraged a beginner, helped a novice, participated in a tower raising, or helped some fellow with a rig problem?

Hams recognize the value of organization within their hobby. Are you a member of the ARRL and your local club?

Hams are public service minded. Do you handle traffic and belong to CD? Are you ready for an emergency? Have you helped a local club with some public service activity? Do you have a ham license plate on your car?

Certainly, no one ham is expected to do all of the above. How do you rate? Make out your own list. Next time you fire up the rig, find a hole, and start operating, ask yourself, "Do I deserve the privilege?"

(FROM SLANT BARS)

U.S. & FOREIGN PATENTS PENDING

MODEL DGA-4075

A complete system package for primary use in the 40 and 75 meter bands at power levels up to 4KW-PEP with secondary operation in other bands at reduced power levels.

MODEL DGA-4075 - \$59.50

Complete packaged Multi-Band Antenna Systems employing the famous Bassett Sealed Resonators and a special Balun. Air has been evacuated from both and replaced with pure helium at one atmosphere.

Highly efficient system packages including all hardware, insulation, coax cable, and copperweld elements assembled at the factory. Complete installation instructions included.

Multi-frequency models available for all amateur bands and for commercial use, point to point, ground to air, military and government.

MODEL DGA-204075

A complete system package for primary use in the 20, 40, and 75 meter bands at power levels up to 4KW-PEP with secondary operation in other bands at reduced power levels.

DX — SOCORRO ISLAND

At the March meeting of the Sarasota Amateur Radio Assoc., W2SAW—Addison Ringler gave an account of a dx-pedition, of which he was a member, in 1965 to the Socorro Island. XE5L, special call, was issued by the Commission of Mexico and an old Mexican Navy boat was used to transport them, the radio gear, along with native families, sheep, chickens, etc. As the Island is uninhabited, the military sent families over for various periods to protect their interests. It took them 68 hours for the trip as they got lost.

Though scheduled to stay 48 hours, the military ordered them to pack up and evacuate after 26 hours, during which time they made 3200 contacts, with 52 countries. The reason became apparent when a typhoon developed and they bobbed around for 3 days. Chairs, dishes, etc. were broken, sheep washed overboard and all were seasick except the four amateur operators. However, they were glad to reach dry land finally.

W2SAW—Addison is retired from the Eastman Kodak Company, has been licensed 50 years and now operates a DX Stamp Service. He is 4th from the top of DX list, needing only 3 more countries. Promises to bring down some slides for a showing of his travels, next year.

THE FCC AND THE RADIO AMATEUR LICENSE

By Roy Scott, W4UHF

At a recent meeting of HARS (Hillsborough Amateur Radio Society Inc.) in Tampa, Mr. John Theimer of the Tampa FCC Office, offered some very helpful suggestions of special interest to would-be amateurs and those going up for a higher grade of license.

He told us how he and other engineers had been quite busy designing and building a new unit for the FCC which will be of great help and service to them in monitoring, etc.

In talking about the important matter of code tests administered by the FCC to applicants for General and higher grade licenses, he suggested it might be wise for code students to get away from the stereotyped tapes which lost their effectiveness after a short while as they are easily memorized. He felt good straight-forward sending at 13 words per minute is to be preferred to code practice prepared by a fast operator who merely lengthens the spaces between characters and words, but the speed of each character might be that of 18 or 20 wpm.

When questioned about the approximate percentage of failure, he stated that a great deal of the failures are due to inadequate preparation, or lack of knowledge of theory.

During the question and answer session, which con-

stituted the major portion of the period, Mr. Theimer stated that all ships still use C.W. and maintain an 8 hour day watch on this mode of communication.

With regard to monitoring, there is about 10 percent monitoring of C.B., but very little monitoring of amateur radio stations by the FCC. This, he pointed out, is due to the fact that hams police themselves and maintain very efficient monitoring equipment. This is largely due to the fact that radio amateurs are proud of their licenses, and treasure them as something special. Deliberate violations are few and far between.

About the future of the ham bands, he said he saw little change because:

FCC EXAMS

SKIP has been notified that the General, Advanced and Extra Class amateur license exams will be given during the Tampa Hamfest in October. They will be held at the FCC office in the Federal Building. Extra Class will be offered at 8:30 A.M. Saturday, October 16th and the General-Advance at 9 A.M. the same date.

All interested persons who wish to take the exam at that time should write: Robert Schappert, WN4NZJ, HARS Secretary, P.O. Box 8092, Tampa, FL 33604. Good luck!

ANOTHER PETITION

Another petition potentially affecting our 220 MHz band has been filed with FCC. RM-1761, by Frederick C. Hervey, K4ETZ, would create a new Hobby-Personal Radio Service 220.5-222.0 and 223-224.5 MHz, exams in regulations only to be supervised by FCC licenses. This one differs from RM-1633 and RM-1747 notably in calling for discontinuance of the Class D CB service over a period of time after creation of the new one.

You'll be proud to learn that The Radio Amateur's Handbook received first place for commercial (i.e., no military contract involved) handbooks in a regional competition of the Society of Technical Writers and Publishers in a field of 30 similar books. (There were seven additional categories not in competition with us). The Handbook also becomes an automatic entry in the national competition, but winners will not be announced until some time next spring. The regional awards will be presented at a dinner in Concord, Massachusetts on June 23, 1971.

Perry F. Williams, W1UED
Senior Assistant Secretary

1. The ham frequencies are by International Treaty Agreement
2. Many other services are going to higher frequencies, thus reducing the demand for amateur frequencies.

An extremely efficient method for monitoring C.B. radio is used, and a fine of \$10,000 and 2 years in prison can be imposed for continued violation after notice is given a violator. There is some effort in Congress to give the Commission forfeiture action in cases of unlicensed operation.

His talk was emphasized by the fact that the FCC is here to help. They want to see every applicant for a radio license pass the tests, and they want to do everything they can for his comfort and convenience, and are glad to assist in every way they can. Another very interesting point that Mr. Theimer brought out is that an applicant for a code test may bring his own key, including "bugs" and electronic keyers should they wish to do so.

His talk was most interesting, and was warmly received and appreciated by HARS members and guests.

NAVY MARS

By Jim Wilson, N0WCK

The code practice broadcasts previously held on 7380 Khz have been shifted to 4008.5 Khz. These are on Tuesday and Thursday evenings at 8 PM EDT. They are conducted by Jim Smith, N0IWY, of St. Pete sending by tape at various speeds from 7 to 20 wpm. He plans to later offer a nice certificate to anyone who submits perfect copy of a message he will include with his code group practice. He invites any ham or prospective ham to copy the tests and report to him. His address is James C. Smith N0IWY, 5671 11th Ave. North, St. Petersburg, Fla. 33710. Let him know you're listening.

Our traffic nets are in the slack summer season with many members away on vacation. While Bob Greenfield, new Area Coordinator for South Florida is away on a trip, Bill Kibbe N0EXU of Clearwater is doing a fine job of carrying on for him.

Henry Sutkus N0GAJ, Area Coordinator for North Florida reports they have 7 new regular members of whom 3 are already active. In addition, 8 new stations have been established

at Reserve Training Centers and two of these are checking in.

North Florida was well represented at the District Conference in Atlanta recently. Present were Area Coord. N0GAJ, AIL, Bob Lillis of N0NIU, and Henry's son, K40OL.

FLA. DISTRICT 2 MARS

By William Budd, A4WDX
The ole lead hoss was outened to the pasture, having served faithfully and conscientiously as Fla. District No. 2 Director and as an active participant in MARS for lo these many years.

One of the outstanding attributes of the members of MARS is the whole hearted spirit of co-operation between the individual members, the

Districts and MDA3! Mr. Mulkey can rest assured that in Fla. he will, under our new leadership, receive the fullest co-operation, even as in the past.

To AA4GUE — Ken, it was nice to have been one of your crew, we do appreciate your leadership. To our new Director AD4WVE, Chris; stand by to man the life boats, she's gonna be a rough voyage but the crew under the new skipper will get us thru. (This is Army talk? Ed.)

Our Fla. No. 2 MARS picnic will be held August 15th at Highland Hammock State Park, near Sebring, our Fla. 1 friends are especially invited to attend, and are requested to bring those big loaded picnic baskets.

The July issue of the Mars News Letter contains, on page 13, a copy of a letter written to a Utility Company by the management of A Nudist Camp for Girls, complimenting the Company's employees upon their excellent service. I heartily agree with the employees desire to render such fine service and I am certain that under the same condx our valiant Mars members would also be willing to render the same service, only more so.

ANTENNA MEASUREMENTS

A lot of radio-type calculations are complicated and we often use measuring equipment that does the calculations for us. Or we use graphs, nomograms, and tables so we only have to do the calculation once. Some calculations are quite simple. I think it was several weeks ago when I remarked about SWR to someone, "SWR ratio is the antenna resistance divided by the line impedance."

If you have a 50-ohm coaxial line feeding an antenna which is loaded up with RF at the frequency for which the antenna is cut and the antenna reflects a 50-ohm resistive load, you've got 1:1 SWR (not possible in this cruel world). If the antenna reflected a 100 ohm load, the SWR would be 2:1 — and so on. If you have an impedance bridge, it can be calibrated very easily to show the antenna impedance and thus serve as an SWR indicator. A bridge is also very good for cutting feedlines to exact half or quarter multiples, for tuning baluns and stubs, and to check dummy loads to be sure they are "dumb." Ray, WA0NEA

HARS NEWS

By Roy Scott, W4UHF

Plans for the TAMPA HAMFEST, October 16th and 17th at the Electrical Building at the State Fair Grounds in Tampa are moving right along, and it promises to be an outstanding event with many interesting activities for all radio amateurs.

Of interest to any amateur attending the Hamfest who wants to take his General, Advanced, or Extra class examination, is the fact that the Tampa FCC Office, through Mr. Angelo Ditty and Mr. John Theimer have made special arrangements to give these tests on Saturday morning, October 16th at the FCC Office in the Federal Building, 500 Zack Street, Tampa.

These examinations are scheduled as follows:

Saturday, Oct. 16, 1971

Extra Class at 8:30 A.M.

General and Advanced Class at 9 A.M.

Anyone wishing to take advantage of this special arrangement should contact HARS Secretary, Robert Schappert, WN4NZJ, at P.O. Box 8092, Tampa, Fla., 33604, and he will in turn co-ordinate with the FCC Office so they will know how many are going to take it.

At the last meeting of HARS it was decided that there would be no meetings during June, July, and August and the next meeting would be on September 21st, at which time the nominations will be made for a new slate of officers.

HAVE A HAPPY AND SAFE SUMMER.
73 UNTIL SEPTEMBER

SUNCOAST ROVING REPORTER

By Cathy Soehl

W4BAV AREA ARNS

K3MAU, Paul Goodrich, founder of the beautiful Confederate Rebel Certificate, recently moved in his new Bradenton Home. June 19th he donned his rubber suit, waded out to extend his pier for the new boat; when using the electric drill, was electrocuted. If a fuse had not blown, his XYL, Jean, would have suffered the same fate when she jumped in and recovered his

body.

SPARC members and friends enjoyed a trip thru East and West Germany, Switzerland and Vienna via the excellent colored slides taken by W4LTE, Wayne Cole, on their trip through Europe.

W4KC, Bill Franklin; K4KE, Dave Stocky; WA4OHO, Bob Blumberg and WA4BGW, Al Friend had nice pictures in the St. Pete Independent, depicting their activities at the ARRL Field Day Contest, held at Florida Power Club.

W4GHR, Bill and W4BAV, Cathy Soehl, enjoyed a visit from WA8QHG, Martha and WA8MJN, George Green; WA8PPK, Fred and WA8DSV, Dorothy Read, who are all down from Cleveland, Ohio area.

W4WDX, Wm. "Shipwreck" Budd, congratulations on your being Master Oscillator for the Knights of the Kilocycle.

Beware of K4DII, Fred McKenzie, who takes very good "candid camera" shots at hamfests, etc., as evidenced by July issue of SPARC-GAP.

GATOR CHAPTER

By K4PI

At the Orlando Hamfest several members came up with the idea of a June meeting appropriate to that time of year. The result was the arranging of a boat trip across Tampa Bay from St. Pete to Bahia Beach on the regular cruise boat from St. Pete Bayfront. The luncheon was held at the Caloussa Terrace restaurant and a total of about 70 persons attended, including guests and XYLs. After the luncheon, most of the women returned to the boat for the "Jungle Cruise" while the men held a brief business meeting in the Bahia Beach motel adjoining the restaurant.

The main points of discussion were the date and location of the fall luncheons. The final decision was to hold these on the third

Saturday of each month starting in October at the Causeway Inn, Tampa pending confirmation with the inn. To save postage, it was decided to send only one notice to members, early in October, to cover the three fall meetings.

Everyone attending the meeting voted it a complete success even though the boat trip was made in a slight drizzle which disappeared as the boat returned to dock in St. Pete.

Q.C.W.A. SUNCOAST CHAPTER

By Bill Soehl, W4GHR

As reported last month, a joint meeting and luncheon of the Gator, Citrus and Suncoast Chapters of the Q.C.W.A., was held June 19th at Bahia Beach. All Chapters were well represented, with between 60 and 70 members, XYLs and friends attending. It was a fine get-together and enjoyed by all, even though a most welcome, delayed rain showed its face and the gang had to dash from the restaurant, across to the motel where the meeting was held and had to be terminated by 2 p.m., so those coming from St. Pete area could board the boat for the return trip. This was the final meeting of the Chapters until Fall; keep in touch via the Gator Chapter Net, Sundays, 9:30 AM on 3613 kHz or 7253 kHz, depending on band condition.

W4OVE, Vance Vogel, is now a Suncoast and W4CMI, Jesse Leach, is now a full fledge QCWA member and we are looking forward to seeing him at the Suncoast Chapter meetings when they resume in the Fall.

COUNTRY COUSINS

By Stan Offenbutter, K4BILM

Judging from all the reports we have been hearing, it looks like everyone had a safe and joyous 4th of July weekend holiday.

Kes, W4GZT, is traveling in his mobile home in Minnesota, also Gus, WA4CPL and Ed, WB4SGW (our new assistant secretary) making short trips. Walt, WA4DCK, returned from a fine vacation,

so did Mike, K4FCS, who was in Pennsylvania. Jack, W4FTR, and family are on a three week vacation in Minnesota with their relatives. Orland, W4LTW, is in Oklahoma attending the FAA school, and should be back by now.

It's nice to have Chet, WA4YRU, back on the air after a long silence... He finally put up the new antenna! Jack, W4FTR, our Chairman of the Board burned his lip after dipping his hand into the hot chocolate cookies that Ruth made. That ought to teach him a lesson to keep his cotton pickin' fingers off the cookie sheet.

Congratulations to Joan, WB4GHD for making the Miami Herald with a swell picture and beautiful write up about her accomplishments! What a gal! Jerry, WB4TPI, is our new Chairman of the Sickness and Distress Committee.

Our latest cousins are Chuck, WA4SYD and Cliff, W4RML — a very warm welcome to both.

A welcome to all to join us every night at 10 p.m. EDST on 3970 KHz. A certificate is given by the Net. For all particulars, please check in.

UNIVERSITY OF SOUTH FLORIDA ARC

By WB4KTG

Our first field day operation was fun, even though almost everything that could go wrong did. At 10 a.m. on Saturday we all arrived, ready to go. Up went the tarpaulin over K4JIE van and WB4LPU, 80-40 base loaded verticle. WB4KTF, Glen, 12 AVQ verticle came next with its radials over which everyone tripped at least once. The 3KW generator, borrowed from USF's Physical Plant, was set up 200 feet from the van. All this was right in the middle of USF's campus.

Here are the mistakes that nobody should make, but which we did: setting the clock 2 hours ahead, then beginning 2 hours early (someone on 15 mtrs. finally corrected this one) and worst of all, we thought that Tampa was in West Florida, which seems logical. So until 5:30 a.m. on Sunday we told everyone whom we worked that our section was WEST FLORIDA. Sorry about that.

Field Day is also a fine day to find out that your rig is putting out no more than 10 watts, instead of its normal 80 watts. So out of our 20 hours of operation we ended up with a massive 200 QSO's, which really made us sick when we heard that one club was averaging 97 QSO's per hour. Field Day was fun anyway. We wish to thank Frank Moore, K4JCP, for his preliminary work for this event.

EVERGLADES AMATEUR RADIO CLUB

By Dick Dowst, WB4HZK

The Everglades Amateur Radio Club held its regular monthly June 11. We have no special report this month as our secy., treasurer and president were all out of town on business and vacations. We did have a very sociable meeting under the direction of the vice president, yours truly. It is very gratifying to see the interest in this club.

I would like to invite all amateurs to one of our meetings. Come down to Homestead on the second Friday of any month and be our guest. We always have the coffee pot on and the radio shack open.

We have now installed a two meter ground plane antenna on top of the Red Cross building here and have it all checked

out in the event of any disaster. We also hope to erect a forty meter inverted VEE in the near future, but we certainly hope that we never need them.

Until next month 73, Dick.

FORT MYERS CLUB NEWS

By Ken, W4SMK

At the July meeting of FMARC Lou North, W4BX, a former official with FCC, gave a talk on frequency allocations. Lou illustrated his talk with some charts, and explained what a complicated problem the development of national and international frequency agreements is. W4BX is now retired up in Punta Gorda, and is another example of the many talented people we have living in Florida.

The June meeting featured a tour of the United Telephone Service facilities in Ft. Myers, which this writer missed, but we understand it was quite interesting.

The club field day effort produced 542 contacts and a claimed score of 1,284 points on SSB with one transmitter. W4LX-4 was at the same location as last year, near the Florida Cities water plant. The weather was good for a change, but there were lots of bugs at times, and not enough operators. W4GYA provided a ten KW generator to run the 200 watt rig, so we had power to burn. Rigs were provided by Don, W4JLO, and Joe, K4HNW.

Attendance at the Summer meetings has been pretty good, what with the usual vacations, etc. Next month is election of officers for the new year, so be sure and come out.

W4IYG and some of the other fellows from Punta Gorda and Port Charlotte came out to applaud their neighbor, W4BX, at the meeting. They told us that rumors of a ham club in their area are not true, yet, but may be some day soon.

NOVICE AT 10, a General at 11, David Wecker, WB4LFA of Miami Beach took 4th in the ARRL Sweepstakes in the SE Div recently. He attends J. F. Kennedy Jr. High School where he helped set up a club station. He plays the oboe, clarinet and organ in the High School band. His dad is WB4HDJ W2FZR. (Photo via W1GSI 4)

W4LNE has been home for a longer than usual vacation from his maritime mobile activities. He is still planning to sell the home and move to Texas.

WESTERN FLORIDA NEWS

By Frank M. Butler, Jr., W4RKH

Field Day reports were received from W4NN-4, WB4VCZ-4, W4RYZ-4, and WB4GTY-4. Other groups reported par-

ticipating were W4UC-4, W44ECY and W4JJ-4.

Pensacola: W4IZM renewed OPS; he has been running PP for South American missionaries. WB4VJM and WB4VJN are new hams in Cantonment. The FFARA Newsletter is being edited by K4SVX and K4CFS while K4LAN is away. The 6-meter gang are back on 50.7 MHz. Sun. and Weds. at 7:00 p.m. — WB4JHQ NCS. W4UBN is a

new station on 6m.

Fort Walton: New hams include W4OUF, W5ZXO-4 and WB0CYD-4. WB4VJP is the new call for the CD EOC. W44WCT is active on 2m FM.

Panama City: K4VPY is new Net Mgr. of QFN. WB4VBV joined the 2m FM gang. W4GGU, W44IMC, WB4LEL, and K4VPY, using call W4JJ-4, reportedly had top FD score in section.

Chirley: W4IKB installed a 22-element 2m beam, 125' up. He was also appointed 00.

Tallahassee: W44VDL, VDM and VDN are new hams. W44VDO, down in Carrabelle, also got his Novice ticket. WB4LOQ's XYL is now WB4VNU! TARC is still looking for a good FM repeater site.

Cross City: WB4VBY is now living here, while WB4RNT lives just up U.S. 19 at Salem. QFN Net Certificates were issued to K4LAN, K4VPY, W4ZWD and K0BAD-4.

TAMPA AMATEUR RADIO CLUB NEWS

By Frank Shannon, K4GT

Summertime is here and club meetings have been discontinued until September, the 20th.

Walter Hudson, Engineering Department, Tampa Electric Company, gave TARC members a very informative talk on his daily problems in eliminating "noise" sources which caused interference to hams. In his talk, Mr. Hudson identified the numerous offenders, such as loose tie-wires, defective lightning-arrestors, loose pole hardware, trees touching lines, and a very tricky one — the defective household door-bell step-down transformer. Mr. Hudson extends an invitation to all hams, in their area, to telephone or write him,

regarding these problems.

Frank Ziegler, K4EUK, our club President, is again stressing our members participation in the TARC VHF Net every Thursday, 8 p.m. on 51.450 MHz, "AM," vertically polarized. Non-members are most welcome! The VHF Net continues thru-out summer.

O. G. Dodson, WB4DJM, had a marvelous vacation with old friend Ralph Covington, at Ralph's QTH in Canal Zone, Panama. "O.G." also net K25BO, a missionary minister, in C.Z., and lended the preacher a hand in building a temporary chapel out in jungle for preaching to the natives there; CU Next Skip, Frank, WAGT

WEST PALM BEACH AMATEUR RADIO CLUB, INC.

By Clara B. Stables, WB4NXX

Field Day has come and gone, but the melody of and the lumps from mosquitoes and other pests immune to insecticides still linger. Just as Field Day ended, Thor, with his magic maul, struck the 15-meter Novice beam. Damage was slight, but the Novices haven't yet regained their Florida tan.

One of this year's stars is Ted Zatesio, WB4TCD, Advanced, just turned 15, who, without previous experience, held his own with the 35-year men. We've sent Diogenes out with his lantern to search for more Teds!

The Two Meter bug bit but did not sting WB4HR. On a recent weekend DXpedition on Grand Bahama, working under the reciprocal VP7, Four Bouncing Rubber Balls made over 60 contacts up, down and across Florida on 146.95 MHz. However, he had to labor for them. His transmitter was adequate, but his receiver had a tin ear. His first contact was W4BUG, Boca, who blasted through with no sweat.

We have just received notification and certificate stating that our Club placed first in Florida in the Third Annual West Valley Amateur Radio Club, Los Angeles, California. Ten Meter Band Opening Contest August 22-24, 1970. Bill Sprague, WB4OUH and Jesse Knight, WB4PPW were the operators. The 1971 Contest will run from 1300 GMT, August 21 to 0100 GMT, August 22. We urge competition. Let's not let ten meters die. It's hard to raise the dead.

Novice Classes start September 6 at 7:30 p.m. Bring a friend, your XYL, your youngster, a neighbor and expose them to Ham Radio.

ORLANDO ARC

By Herb, W4LSR

Our June meeting was very well attended. We reviewed our recent and highly successful hamfest and commended K4VFW who did such a fine job as Chair-

BURNING UP THE UHF band on 449.1 MHz with his 350 watts output is Ray Clarke W4ITE of South Miami. Ray is an active member of the South Florida FB Assn. and can be reached most anytime through the Miami Repeater.
(Photo by K4ANW)

man, while he praised his committees for their efforts. It was handshakes all around. New members in June are WN4SLL and W4WLX. An interesting FM program was presented to the membership.

Our club station went portable for Field Day. WN4OOS ramrodded the very successful affair under the guidance of W4CFA and W4TOD and with the eager help of WB4OAA, WB4QPW, WN4SQA, WN4TYH and WN4UOK. W4NGR and W4ASHI had found an excellent location for the exercise and our youngsters made the most of it. W4CFA and W4TVR fed them royally.

W4CLJ got his tower and stacked beams up, at the new QTH. Whoever borrowed his manual for the Jones micromatch SWR bridge, please return it to Jess. W4YSO mobilized north for the summer. He expects to be operating his HW100 portable and to return to Winter Park around Labor Day. Speaking of HW100's, W4MCV is delighted with his. W4HFR is still walking bent over but he is quite cheerful about it. Possibly because he can't mow the lawn and has more time to enjoy his Regency HR-2.

WB4LNY wants it known he is spending his vacation at home and not out of town. W4NGR and W4CII plan to spend their two weeks in their Travel Trailer at Blue Springs. K4VFW haven't told us where he will be during his vacation early in July. WN4OOS finally got a real hot antenna up for 2 meters. He is having a ball on 2 with his MCW but the rest of us pray he will soon be a WB4.

HOLLYWOOD A.R.C.

By WB4HML

Field Day 71 style went off without a hitch, and for a young club's first effort it was a great success. More than 20 members participated actively at WB4TON and about 35 to 40 showed up all together for the 27 hour stint.

Yellow and Orange vests are blooming all over Hollywood. Over 40 have been purchased with orders for 20 more.

Welcome to Ray Smail, W4NPE, he joined up during Field Day. Glad to have you aboard Ray.

The July meeting was held at Miramar High School elect. lab. The guest speaker was Mr. Stallings from F.P.L. on the subject of line noise. The August meeting will be held at home grounds, Chaminade High science room.

According to WB4LZQ, our QSL manager, WB4TON Worked All States during the FD and he started sending cards for same.

The June issue of our Newsletter was superb, pictures and all.

As always, visitors are welcome at our meetings. Remember, be an active member.

FIVE FLAGS AMATEUR RADIO CLUB

By Gene Rummel, WB4KUF

"Disaster" best describes this years Field Day Exercise. Field Day was held at the usual place, Santa Rosa Flying Field on highway 87 south of Milton, Fla. To

many problems cropped up for the eager crew and it was evident that "Murphy" had done his trick. One of the major difficulties was, that the main Generator that supplied power to the transceivers decided to get tired so it shut off but not before it had burned up two of the rigs that were in used. A good time was had by all and much experience was learned.

This month's meeting was held at the club house on Government St. and since there weren't enough of the membership present to vote on issues, a rather interesting discussion was held over coffee and donuts.

Plans for the VHF Contest to be held in late August or early September are under way. More details next month.

It was evident that this month's club newspaper was a change and much hard work was put forth. Keep up the good work gang. After attending the monthly meeting of the Pensacola FM Repeater Ass'n Inc. it was learned that the club has a new 500 watt Afterburner.

Meetings are held the last Thursday of the month at Blalock's. Courtesy of Fletcher Blalock WB4MWX. Thanks go out to KOBAD-4. His untiring efforts with the latest code and theory class. If all goes well 17 new Novices will be on the bands soon.

DELTONA HAM NEWS

By Jack Six, W4YPA

Deltona CD net doing very good for summer the usual ones check in and round table follows the simulated emergency traffic. Meetings are most enjoyed by all since we have no radio club in Deltona.

G4DKS-W4, Keith now has a new folded dipole up in inverted V also built a FB center post for it from the Hand Book working out real good reports Keith.

The Sunday QCWA Net is still growing and is having good attendance even though the snow birds have gone North. I had a nice QSO with W2NQT, Mark Devaney, and he informed me that it is confirmed that a signed petition from K4UGA, Barry Goldwater with the required signatures is on file at headquarters for QCWA President next election.

K4LZ, Tom Ames, left July 7th for an extended visit to Massachusetts.

W4LYR, Russ, reports that his Mini Beam is doing a nice job for him. Russ is also shopping for a linear amplifier.

That's all for now, be happy and smile, this is the most important day of your life because you are here.

FLORIDORA NEWS

By Charlotte Frazier, WB4PEL

W4LZI, Frances Waples, became a Silent Key May 16th. Belated heartfelt sympathy to her family.

K4UIZ, EV and OM, W4BKC, Hal, went deep sea fishing recently and Hal battled a sailfish for 45 minutes only to lose it when the mate grabbed the wire. Better luck next time, Hal.

K4RHL, Ellie, is going to Cleveland (if there are no hurricanes) the middle of July to see her son-in-law in the air races. She is also looking forward to next February when she will make another trip to Africa.

W4BIL, Fran and OM, W4WME, Bill, left July 7th for a trip to Georgia and the Carolinas. Hope you have a grand time having with your campers.

W4IUR, Mim, has taken over the office of Speech Amplifier on the Knights of the Kilocytes, relieving W4WPD, Shirley, who took over the job when W4HGO became a Silent Key.

The Floridora history was published in the "Crosstalk" publication of the Gloucester County Amateur Radio Club of New Jersey, by W4FMS who picked it up from the "CLARA" publication, which was sent in by W4BAV, Cathy. Floridoras getting widespread publicity.

Many thanks to Cathy for sending most of the news to be published. How about the rest of you? Please send me anything that

you are doing or planning to do in the near future.

WB4FVN, Nellie, W4GPX, Ruth and WB4PEL, Char have been active on six meters. We have been looking for more XYLs and YLs to join us in the Clearwater area.

Let's hear from you so that we can bring everyone up to date on the activities of our members.

DADE ARC

By Paul Norman

June 26-27 was the big day, more like days and nights.

Again this reporter has to admit that Field Day, as practised, is not a very practical emergency test of Amateur Radio Capabilities. I personally believe that an absolute limit of 5 miles, and no bridges, should be imposed on Field Day participants.

The Dade Radio Club held its Field Day at the tip of Miami Beach at the Boy Scout Camp and we had a good turnout. 17 showed up.

It would be appropriate, I think, to use this column to pass out a little praise to several of our club members that gave outstandingly of their time for this particular field day.

Chuck Bolvin, K4KQ, was our Field Day Chairman, Chief CW op, Assistant Chief SSB op, supplier of 75 percent of the equipment, gave 110 percent of his time. Chuck and I do not see eye to eye on many things, Field Day being one of them, but you cannot fault Chuck for his effort.

Gloria Veres, Mom of Chip, WB4QGN. Gloria was our food chairlady and the Field Day would have fallen apart without her constant effort. She must have logged 300 miles on her car going and getting. In between times she logged, visited, and, in general, the second most valued member of this Field Day gang.

Jay Hecker, WB4HDZ, our errand member. Jay was on the go the whole time. There was nothing that needed being done that Jay was not ready, willing, and able to do. It could be that he was showing off for Carol — Bless her heart, she stayed through the whole thing and falling down tired — but I don't think so. His final act after close of operation was he hoisted Jay on top of the building, in the rain, and he dismantled the vehicle. No greater love hath any ham.

Of necessity, I can't give proper credit to all the folks that worked so hard, got so tired, and still stayed in a good mood.

The XYLs are to be mentioned in particular. The interest in their O.M.'s

activities is to be applauded. A ham is a ham but an XYL is a doll to put up with all the odd things we do.

BROWARD A.R.C.

By Jim Wilson, W4GDK

Broward's Field Day setup operated Saturday and Sunday under very threatening skies, but it was not until mid afternoon Sunday that the "wet stuff" came down in quantity. As a consequence they decided to fold up their tents and leave.

Bob Crispin, WB4OOL, (with a new Advanced Class ticket) was our Field Day Manager this year. He had 2 rigs going, used 7 operators. Among these were Gerry Kemler, Mark Zegel, Jim Davis, Bob Crispin and Bill Lando. A nice picture of the boys in action appeared in the FT. LAUDERDALE NEWS.

Bob reports 12 pages of contacts and feels everyone had a good time.

At the June meeting, Civil Defense provided a late film on Hurricane Camille which brought thrills to the viewers as they realized how easily this could happen to us in Broward County. Twenty-five members were present despite a downpour before the meeting.

TAMPA BAY REPEATER ASSOCIATION

By Jack Howell, K4LMI

Hooray! The Repeater is back on the air. A whole heap of thanks to Ken, WA4HAA, his wife Rose, Bill, WB4KLW; Jack, K4LMI; Jim, W4APV; Al, WA4BGW and all the others who helped get the job done. Everyone seems pleased with the results. The club held a small contest to see who could guess closest to the correct value of power output of the Repeater when it went back on the air. New member, Cal, W4JVQ, won a free month's membership with a guess of 200 watts.

At our June meeting representative to the South Eastern Repeater Association, Walt, WA4FBI, reported on the SERA meeting held at the Orlando Hamfest. Each member club is to list their nominations for officers, elections to be held at the Melbourne Hamfest in September. SERA is becoming truly regional with a new member, Alford Memorial Radio Club of Morrow, Ga., which operates the Stone Mountain Repeater.

SERA also selected TBRA's publication "QSP" as its official bulletin. Keep up the good work, Walt.

FPTN

By Case, W4NGR

Old summer slump has 'hit' us! June's participation and traffic handled was way down. Many of our regulars are on vacations. Birch, WB4AIW is absent! Tom, WA4HWE has had his up's and down's, having gone into the hospital. Tom is now back on the air and improving nicely.

Roy, K4EJW sent a "Having a wonderful time wish you were here" card from Canada. Herman, WB4FJY is back from his sojourn to Europe, wonder if he got to "Eyeball" some rare DX!?

W4IAD is changing his QTH at Tampa. Tony, W4JQ's stock answer to roll call is, "Good Morning — I Ain't Got Nothing." Cone, K4LPS keeps us informed on the ARRL Official Bulletins. To those faithful few who keep our strength up — W4DDW, W4SNP-M, W4UGQ, W4AOB, W4BKC to name a few, Thanks! for being with us. Look for us (W4NGR-4) at some campground throughout the state on weekends. Best 73 to all of you!

ALL SMILES after the Florida Midday Traffic Net dinner at Orlando Hamfest: Standing: W4BKC, K4OER, W4HED and W4LSR. Seated: W4SDR, Mgr. of FMTN. (Photo by W4ABY)

FLORIDA MIDDAY TRAFFIC NET

By Herb, W4LSR

Dick, K4LEC returned from his vacation in June. We missed him as Thursday NCS except on June third when we had Ruth, W4HED substitute for him. Charlie, W4AKB, has been checking in occasionally and so has Jim, W4GDK. Al, WB4AID left for Europe and he expects to be gone all summer. Herb, K4DAX has gone to his new home in Texas. Kelley, W4FJA has

accepted the position of Assistant Manager of our net and I, J., W4SCK, has volunteered to serve as OBS, both replacing Herb. Birch, WB4AIW, will be off to Atlanta early in July and expects to return in a couple of weeks.

New members in June are Lu, WB4RLU in West Palm Beach, Steve, WB4CVH in Lake Worth and Chuck, WB4TEO in Lakeland. Welcome fellows.

Flash!! The 1972 Orlando Hamfest is tentatively set for May 20 and 21 at a new, bigger and better location. More about it later.

The FMTN held 26 sessions in June, 827 stations passed 254 pieces of traffic.

FLORIDA FAA NET

By George Cooper, W4EH

It is with deep regret we record the passing of W4ZL, Harold Burhop. Harold's long time friend, W4YB, Stark Totman was in attendance at the funeral.

In a happier note the members of the Florida FAA Net extend their congratulations to W4WKQ, John Zwaska, on the marriage of his lovely daughter Barbie. John's boat the "Barbie VI" is being fitted out with a new Swan, Hustler vertical and two meter FM equipment. We are waiting for John to check in signing W4WKQ-MM.

It was a most pleasant surprise to have W4LIU, Blair Pearson, drop by for an eyeball QSO. Blair and I both served aboard the U.S.S. Wyoming and we had a lot of sea stories to swap.

My friend, K4PH, Al Hendrick, Sarasota, changed from a vertical to a dipole and went from about an S-2 to S-9. WB4AIW-4 operating from Atlanta, Ga. comes in with a big sig.

W4DWD, Jules Bamberg, appears to be having the same problem as many of us "OLD TIMERS." That print in the call book is sure getting small.

Summer vacations are the order of the day with K4HV, Bill Schroeder, and W4BIC, "EK" Slain with new "NOMAD" travel trailers. Good luck fellows but DRIVE SAFELY.

Speaking of vacations, W4EH, George, planning a trip to see "MAMA" in Akron, Ohio. Have asked WB4BZW, Bill Smith, to do the Sept. column Florida FAA Net. Bill is with the "International Flight Service Station" Miami and one of the best in the business. He was also one of our best pilots during WW2 flying the famous B25s. Of you who like to do some hanger flying be sure and contact WB4BZW, Billy "Arnold" Smith.

For W4JVA, Paul, I will try and get around to all of your new check-ins and the back log of news for the Florida FAA NET.

WORLD SKIP

By Phil Reid, WB4ONC

DX activity has again increased with many DX-peditions on now and being planned. Conditions continue to be very good to all sections of the world on 20 meters and 15 is fairly open into Europe, Africa and Oceania.

DX-PEDITIONS

1S9 — Spratley Island — There is a rumor that a VS6 may be thinking of a trip to Spratley sometime in late July or early August.

5H1 — Zanzibar — 5H3LV should have this QTH activated by the time this is read. The call will be 5H1LV.

CEOX — San Felix — This rare QTH is going to be activated soon, most likely in mid or late August.

RARE STATIONS ACTIVE

FK8 — New Caledonia — Jean, FK8AB, is active on 20 meter CW around 0600Z.

YB9 — Indonesia — Jerry, YB9AAT, is active around 14.280 at 1200Z.

WEST PALM ARC (W4HAW) cleaned up on 15 SSB during Field Day when Ted Zateslo, WB4TCD took the controls. He worked hard all day. Ted is 15 years old and holds an Advanced ticket. (Photo by WB4NXX)

ZD5 — Swaziland — ZD5X on 20 CW at 1200Z Long Path.

C21 — Nauru Is. — C21AA is active on 20 CW and on SSB around 14.190 listening 14.210.

FB8 — Amsterdam Is. —

FB8ZZ on 14.028 at 1130Z.

OH0 — Market Reef — OH0MA is on 15 CW xtal controlled on 21.086 and 21.106.

Mary, WA3HUP, along with CT2AA and CT2BB have

organized the Arabian Knight DX Net. The list for this net is taken on Thursdays at 1900Z and the actual net is on Saturdays at 1900Z. The frequency is 14.295.

5H3LV reports that Tanzania should be easy to work. He lists 5H3s KG, KA, LZ, ML, MM, MT, and MV at the total active stations.

DX-PEDITIONS NOW ACTIVE

JD1 — Ogasawara Is. (Bonin Is.) — JD1ACH by JA3JZ is active on SSB near 14.200 and on CW at 14.025 around 1100Z.

PY0 — Trindade — PY0ATG is active on 14.195 listening 14.205 around 0130Z.

3C0 — Annabon — 3C0AN is active (until mid July). QSL to OH2NB.

FOR THE XYL ONLY

By Flo Ann, WN4RSM

I've noticed that many XYL's have a negative image of Ham Radio as a hobby for their husbands. They get irritated at their husbands' sitting at the squawk box morning, noon and night, weekdays and weekends.

Wives of golfers and hunters have this problem, too. It's pretty ego-deflating when your one and only seems to prefer something else to you, whether it's a radio, a bunch of golf clubs or a shotgun.

I'm not going to run Ham Radio into the ground as the great public service hobby that keeps the kiddies off the streets. I'm sure you've had that rammed down your throat often enough.

I'd just like to say give the boys a break.

If you can't fight 'em, join 'em.

Your old man would be pleasantly surprised if you asked him to explain to you how that contraption works.

Code is not so difficult to learn, and you can even cram enough theory into your head, between scrubbing floors and getting the kids off to school, to pass that test. There are a surprising number of YL's and XYL's with licenses.

If you don't feel inclined to go into it deeply enough to get your license, you'll be rewarded by the happy expression on your OM's face when you show some interest in his treasured equipment.

Who knows? You might even learn to like it.

WANTED: RM-50 IF adapter for CE-MM2 analyzer. Jack Shirek W4FTR 605 Citrus Ct. Melbourne Beach, FL 32951.

WIDOW wishes to sell husbands amateur radio equipment. Units too numerous to list here. Please call Mrs. Harold A. Rensch, XYL W4DRC, 2455 Key Largo Lane, Ft. Lauderdale, FL 33312 Phone 583-8337.

FOR SALE: National NCX-3 transceiver with AC supply, Astatic mike, \$210.00. Electronic slide rule and instruction books \$12.00. Tape recorders new O' General \$25.00. Used Sony \$110.00. No shipping. Henry Miller W4VGJ, 809 Imperial Palm Dr., Largo, FL 33540.

REPEATER DIRECTORY

The ARRL Repeater Directory, a brief compilation of repeater information geared to the use of the operator, is ready for distribution. Planned initially as a supplement to the ARRL Net Directory, it was decided to produce the repeater listing first to make it available to mobiling hams during this vacation season. For each copy of the Repeater Directory, send a legal sized addressed envelope with 8 cents United States postage to ARRL, 225 Main Street, Newington, Connecticut 06111.

(ARRL OB 330)

LETTERS TO THE EDITOR

(Continued from Page 2)

has renewed its license with their old call WB4TGA.

Our present activity is very much reduced because of student work load and many of the boys work part time. Those that do come in and work with the equipment available are fascinated by RTTY and work on 20M with a Ranger II.

Some of our future students have come through our electronics' labs and have shown enthusiasm over our Ham Shack and it looks as though our club will really perk up come September.

From an ad in Skip, we received a model 19 teletype and although our old model 26 still needs a gear, we are in great shape thanks to SKIP.

73.

NEW EDITION

SECOND-CLASS RADIOTELEPHONE LICENSE HANDBOOK by Edward M. Noll. The emphasis of this book is placed on two-way radio, since it is the major field of activity for the second-class radiotelephone license holder. Completely updated, the discussions of the latest solid-state two-way communications equipment are included in this revised edition.

The first five chapters cover FCC Rules and Regulations, operating procedures for radiotelephone communications, transmitter tuning and adjustment, etc. Chapters 6 through 14 are study guide chapters that contain questions and answers on Elements I, II, and III of the FCC EXAM. Each of the study guide chapters include a self-examination, with the answers provided.

Chapter 15 contains two 100-question tests to simulate the FCC examinations. These tests are presented in the multiple-choice form of the FCC tests. The answers to these tests are also given.

Finally, the book has appendices which contain extracts from the FCC Rules and Regulations. These extracts contain valuable information that can be used as reference material.

SECOND-CLASS RADIOTELEPHONE LICENSE HANDBOOK will help the reader acquire a license, and will continue to serve as reference material

once he is licensed.

SECOND-CLASS RADIOTELEPHONE LICENSE HANDBOOK, SAMS Catalog No. 20824. Size: 360 pages; 5½" x 8½"; softcover. List Price: \$6.50. Howard Sams, Inc., 4300 W. 62nd St., Indianapolis, Ind. 46268.

SOCIETY OF WIRELESS PIONEERS

The above named organization, consisting of former commercial or government wireless operators, that is, anyone who has earned a living at pounding brass over the air prior to 1955, is now well established, with a 50 percent increase in membership during the past year.

Founded three years ago by old time West Coast operators, we have rapidly spread to include former operators who worked on the Great Lakes, Canada and foreign countries. During the past year the East Coast (including Florida) has had a big increase in membership.

To those in Florida who have already received applications and full information, we urge you to fill in and mail your application promptly. By doing so you will receive the Society's

quarterly News Letter and Membership List, the first issue of 1971 to be mailed within a few weeks.

In addition, the Society's now famous publication "Ports-O'-Call" is being readied for publication early this year and will be bigger and better than previous annual issues, which have received wide acclaim in various amateur publications. "Ports-O'-Call" is available to SOWP members only.

For further information or membership applications write or phone K4PI or W4DL.

Within the next three months we feel confident there will be enough members in Florida to arrange a get-together of all state members, probably at the Orlando hamfest, to discuss forming an all-Florida Chapter, and plans to set up Chapter meetings at regular intervals.

VHF'ERS COLUMN

By Frank Shannon, K4GT

As promised in last month's column, this one will be mostly on 6 and 2 Meters, AM, SSB, CW, both individual and nets or groups.

Gulf Coast Amateur Radio Club sponsors their own net every Wednesday at 7 p.m. on 50.4 MHz "AM," mostly vertically polarized. They also participate in the Rag Chewers Net every morning at 9 a.m. on 50.4 MHz, "AM," mostly vertically polarized.

SPECIAL NOTICE: W4VCY, under letter-authority of National Bureau of Standards, dated 13 April 1971, has been granted permission to act as a re-broadcast station for WWV. This will benefit those who operate strictly on 6 Meters and do not possess a receiver capable of receiving WWV direct. W4VCY requests your suggestions regarding the time or times you desire this re-broadcasting of WWV. At present W4VCY will re-broadcast WWV time signals on the morning Rag Chewers Net. Write or contact him direct, regarding additional times. He, under the FCC and NBS rules must file a semi-annual report

of such rebroadcasting. **NOTE:** Effective 1 July 1971, WWV changed their operation to voice announcement every minute, instead of previously on every five-minute periods. There is no, repeat no code sent, voice only.

For you VHF'ers on SSB, a group of mostly retired "Senior Citizens" operate Mondays thru Saturdays on SSB, 50.150 MHz, mostly on beams horizontally polarized. They commence at 9.30 AM and continue until "exhausted". Facetiously, they refer to themselves as "The Medicare Group!!" They do really welcome any VHF'er, regardless of age!

HOW IS YOUR STANDING WAVE?

Did you ever blow a mica condenser in the PI-output section of your transmitter? That can easily happen if your SWR is too high — you may have 200 watts going out and 180 coming back which heats up the feed line or output tank circuit and causing a break-down and short out.

This trouble will be more noticeable when the antenna is too short or the feed line becomes a part of the antenna circuit. In many cases the co-ax will break down, particularly if you are using old stuff and running more than a few watts of power. Usually a SWR bridge will show the deficiency. That is why it is important that the feed-line be exact on short beams or shortened antennas as the feedline is a part of the matching system. Even on "heavy-duty" coax, "hot spots" will show up especially around the connectors or couplings where RF has a chance to leak out.

Damaged Co-ax will show up on receiving by loss of signal, in some cases, noisy reception. Discoloration of the braid will show that "hot spots" were present. Check your transmission line by "feel" (with rig off) or feel the out-put condensers of the PI-NET — if they are unusually warm, go further in your investigation. This "FEEL" method is not safe practice unless you PULL THE FUSES or disconnect the power input.

We don't want to print any obituaries of some good Minnesota MARS member. — Check your SWR nevertheless. (From Minn. MARS)
